Backup client for encrypted online backups
Duplicati is a free backup client that securely stores encrypted, incremental,
compressed backups on cloud storage services and remote file servers. It
supports targets like Amazon S3, Windows Live SkyDrive, Rackspace Cloud Files
or WebDAV, SSH, FTP (and many more).

Duplicati has built-in AES-256 encryption and backups can be signed using GNU
Privacy Guard. A built-in scheduler makes sure that backups are always
up-to-date. Last but not least, Duplicati provides various options and tweaks
like filters, deletion rules, transfer and bandwidth options to run backups
for specific purposes.
